

MUBA BLOCKCHAIN HACKATHON 2026 · GONKAROUTER TRACK

The answer key is wrong. Nobody checked.

Cekgu reviews a quiz before learners sit it.

TEAM M1KU **ROSTER TO FILL**

PROBLEM STATEMENT

One wrong key, every learner pays.

A wrong key. Two defensible answers. A missing word.

The paper was vetted. The defect survived.

SUPPLIED KEY

- A

Stack
- B

Queue
- C

Binary search tree
- D

Hash table

Published. Nobody re-solved it.

VETTED

PROJECT OBJECTIVE

Spend human attention where it matters.

EVERY ITEM, READ AGAIN 12

THREE ITEMS, IN ORDER 3

●○ Possible Key Error

●○ Possible Key Error

ⓘ ⓘ Possible Ambiguity

9 items

● Clear

The public sample record, 12 items

Two readers, blind, then a fixed rule.

Key Withheld

TWO MODEL FAMILIES, ANSWERING BLIND

MiniMax-M2.7

Queue

=

Kimi-K2.6

Queue

CHECKED IN THIS ORDER

- 1 Unverified
fewer than two verified readings
- 2 Split Opinion
the two answers differ
- 3 Possible Ambiguity
both list more than one option
- 4 Clear
the shared answer is the key

THE SUPPLIED KEY

Stack

5 Possible Key Error
the shared answer is not the key

SUPPLIED KEY

A B C D
Stack

MiniMaxAI/MiniMax-M2.7

A **B** C D
Queue

Receipt Verified

A **B** C D
Queue

Receipt Verified

●○ Possible Key Error

Both readers chose Queue. The supplied key is Stack.

Nobody told them the key.

Both chose Queue. The supplied key says Stack.

Cekgu asks a human to look. It changes nothing.

Every reading carries a request id.

Copy it into the receipt URL. The gateway names the model that answered.

PUBLIC SAMPLE RECORD, QUESTION 9

SERVED MODEL

MiniMaxAI/MiniMax-M2.7

REQUEST ID

Verified

SERVED MODEL

moonshotai/Kimi-K2.6

REQUEST ID

req-1788427238422211356-414867

Verified

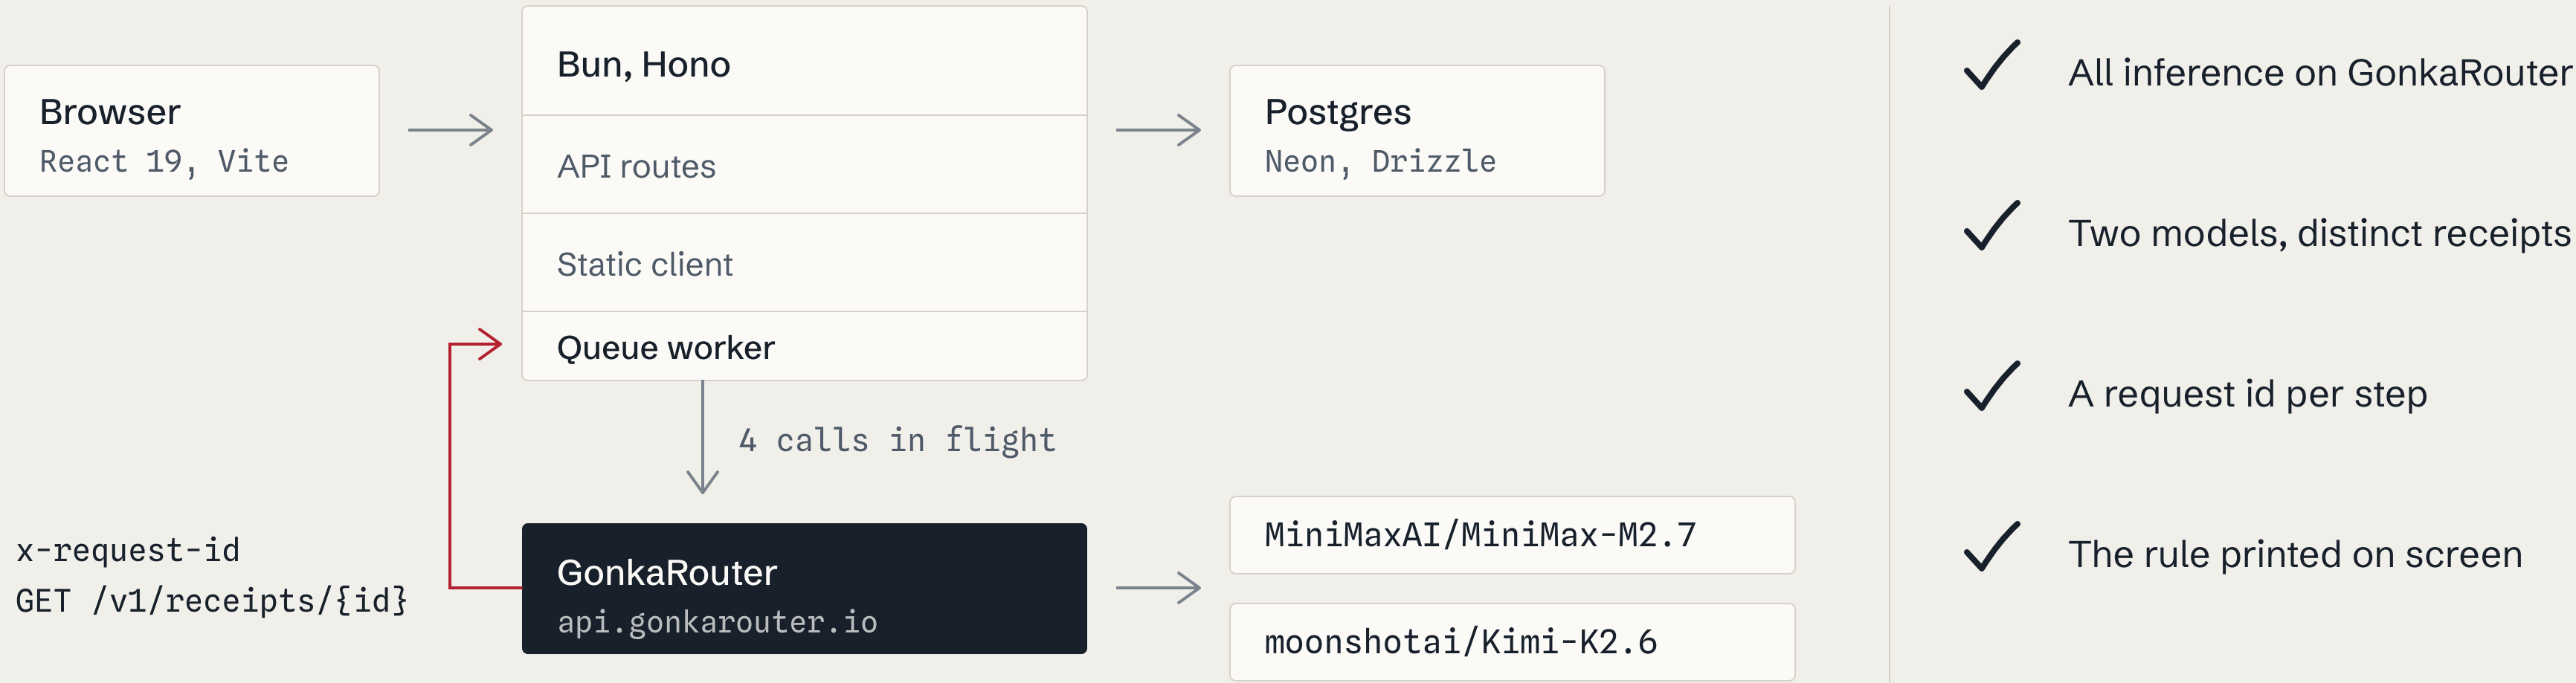

api.gonkarouter.io/v1/receipts/req-1788427238422211326-414866

●○ Possible Key Error

Both ids are on the public sample record. Neither reading counts without one.

One process. One gateway. Two models.

No other AI provider exists anywhere in the code.

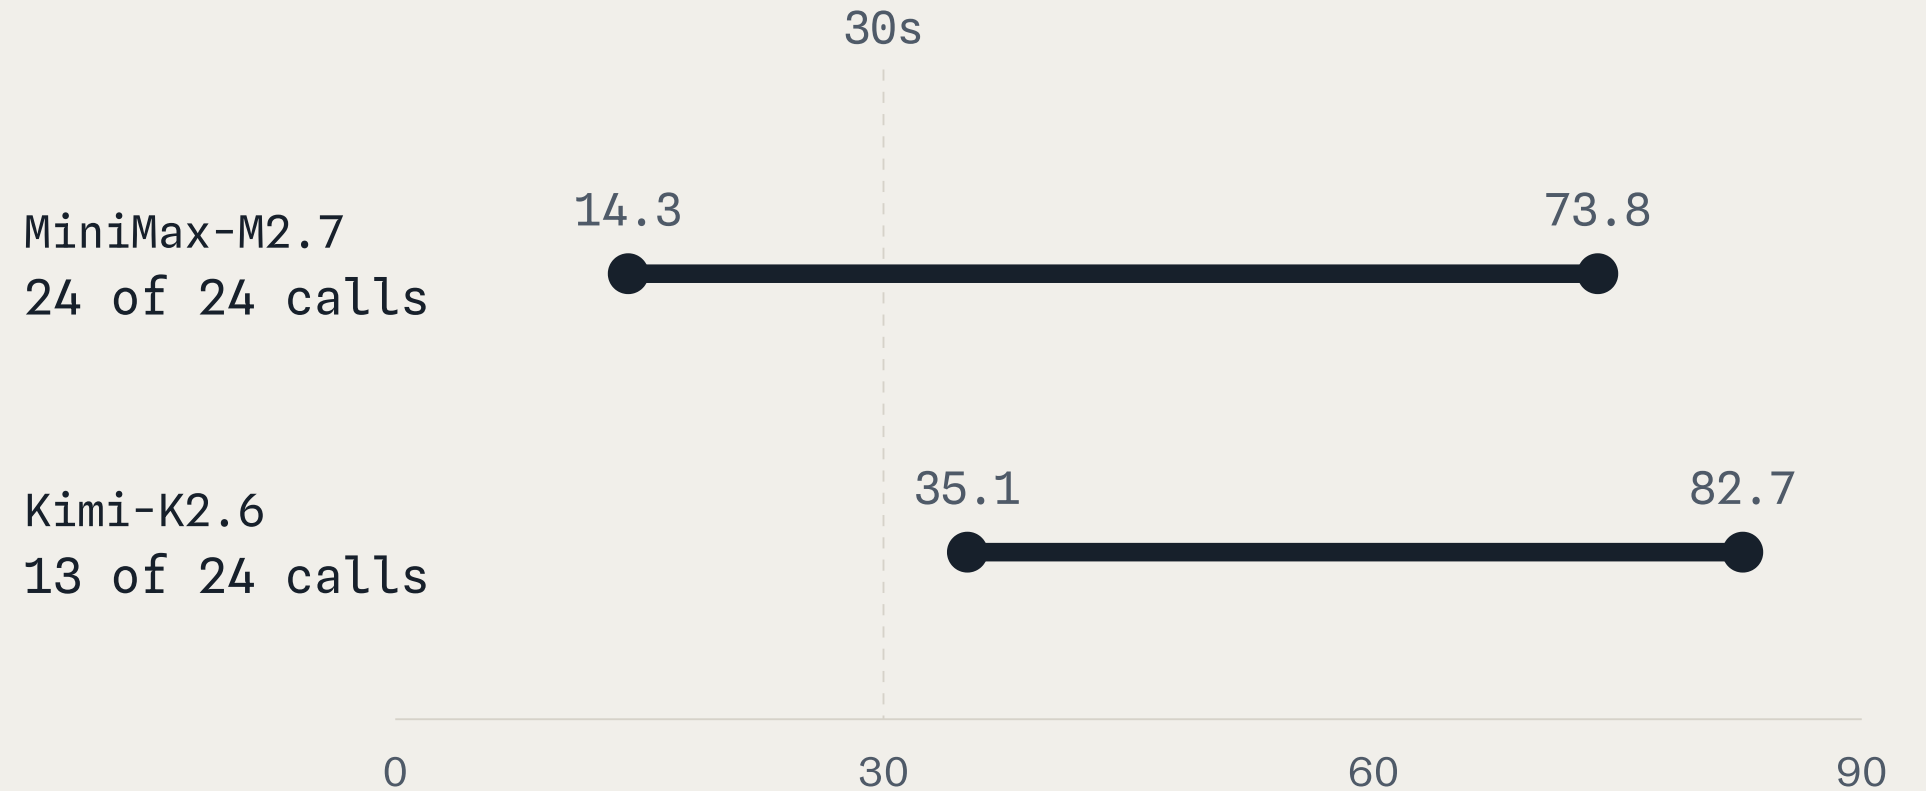

MOTIVATION AND CHALLENGES

No item had two readings in 30 seconds.

So Cekgu queues the work, retries, and fails closed.

Fewer than two verified readings is never a verdict.

SECONDS TO A COMPLETED CALL, 3 SEP BENCHMARK

THE QUEUE WE BUILT INSTEAD

12 of 12

items reached two receipt-verified readings

18 of 42

rejected attempts, kept with their reason

QUESTIONS CHECKED PER MONTH

Guest is a shared demo workspace, expiring in 24 hours.

BUSINESS MODEL

We charge for questions checked.

Not tokens. The educator never sees a model bill.

Pilot pricing. No buyer has paid yet.

Check the exam before the exam checks us.
